Subject: Alon/San Joaquin/Elk Hills power

David,

I am leaving shortly. I thought about Mike's request and think a reasonable tact is just to ask Jonathan Bishop for a meeting to discuss without putting a specific agenda down in writing. So I am not proposing an agenda, but this is a list of things to be discussed:.

The issues to be resolved are

Elk Hills Power

Can the Water Board retract their Feb 11 letter?

Can they make a final decision regarding a partial Tulare Formation exemption and when

Are they amenable to EPA requesting that the operator drill deeper wells

What can we do to help?

Alon/San Joaquin

Can they retract their de-designation of beneficial use since it was based on false information

Are they amenable to EPA requesting that the operator at Alon drill deeper wells

What should be done about San Joaquin, we have no records

What can we do to help?

Are there any other Class I operations going on that are operating under WDR that we should

bring into SDWA compliance
